Assignment 8

This assignment is due in the specified time.

Due on 2023-11-15, 23:59 IST

1. Which of the following processes takes place when two molecules compacted at room temperature? (1)
   - Plastic deformation
   - Extrusion
   - Injection molding
   - Extrusion
   - None of the above

2. The process of compaction is used to:
   - Change the shape of a material
   - Change the size of a material
   - Change the color of a material
   - Change the texture of a material
   - None of the above

3. Which of the following processes is used to join two or more materials together? (1)
   - Soldering
   - Brazing
   - Adhesive bonding
   - Mechanical joining
   - None of the above

4. Which of the following processes is used to join two or more materials together? (1)
   - Soldering
   - Brazing
   - Adhesive bonding
   - Mechanical joining
   - None of the above

5. Which of the following processes is used to join two or more materials together? (1)
   - Soldering
   - Brazing
   - Adhesive bonding
   - Mechanical joining
   - None of the above

6. Which of the following processes is used to join two or more materials together? (1)
   - Soldering
   - Brazing
   - Adhesive bonding
   - Mechanical joining
   - None of the above

7. Which of the following processes is used to join two or more materials together? (1)
   - Soldering
   - Brazing
   - Adhesive bonding
   - Mechanical joining
   - None of the above

8. Which of the following processes is used to join two or more materials together? (1)
   - Soldering
   - Brazing
   - Adhesive bonding
   - Mechanical joining
   - None of the above

9. Which of the following processes is used to join two or more materials together? (1)
   - Soldering
   - Brazing
   - Adhesive bonding
   - Mechanical joining
   - None of the above

10. Which of the following processes is used to join two or more materials together? (1)
    - Soldering
    - Brazing
    - Adhesive bonding
    - Mechanical joining
    - None of the above

11. Which of the following processes is used to join two or more materials together? (1)
    - Soldering
    - Brazing
    - Adhesive bonding
    - Mechanical joining
    - None of the above

12. Which of the following processes is used to join two or more materials together? (1)
    - Soldering
    - Brazing
    - Adhesive bonding
    - Mechanical joining
    - None of the above

13. Which of the following processes is used to join two or more materials together? (1)
    - Soldering
    - Brazing
    - Adhesive bonding
    - Mechanical joining
    - None of the above

14. Which of the following processes is used to join two or more materials together? (1)
    - Soldering
    - Brazing
    - Adhesive bonding
    - Mechanical joining
    - None of the above

15. Which of the following processes is used to join two or more materials together? (1)
    - Soldering
    - Brazing
    - Adhesive bonding
    - Mechanical joining
    - None of the above

16. Which of the following processes is used to join two or more materials together? (1)
    - Soldering
    - Brazing
    - Adhesive bonding
    - Mechanical joining
    - None of the above

17. Which of the following processes is used to join two or more materials together? (1)
    - Soldering
    - Brazing
    - Adhesive bonding
    - Mechanical joining
    - None of the above

18. Which of the following processes is used to join two or more materials together? (1)
    - Soldering
    - Brazing
    - Adhesive bonding
    - Mechanical joining
    - None of the above

19. Which of the following processes is used to join two or more materials together? (1)
    - Soldering
    - Brazing
    - Adhesive bonding
    - Mechanical joining
    - None of the above

20. Which of the following processes is used to join two or more materials together? (1)
    - Soldering
    - Brazing
    - Adhesive bonding
    - Mechanical joining
    - None of the above

21. Which of the following processes is used to join two or more materials together? (1)
    - Soldering
    - Brazing
    - Adhesive bonding
    - Mechanical joining
    - None of the above

22. Which of the following processes is used to join two or more materials together? (1)
    - Soldering
    - Brazing
    - Adhesive bonding
    - Mechanical joining
    - None of the above

23. Which of the following processes is used to join two or more materials together? (1)
    - Soldering
    - Brazing
    - Adhesive bonding
    - Mechanical joining
    - None of the above

24. Which of the following processes is used to join two or more materials together? (1)
    - Soldering
    - Brazing
    - Adhesive bonding
    - Mechanical joining
    - None of the above

25. Which of the following processes is used to join two or more materials together? (1)
    - Soldering
    - Brazing
    - Adhesive bonding
    - Mechanical joining
    - None of the above

26. Which of the following processes is used to join two or more materials together? (1)
    - Soldering
    - Brazing
    - Adhesive bonding
    - Mechanical joining
    - None of the above

27. Which of the following processes is used to join two or more materials together? (1)
    - Soldering
    - Brazing
    - Adhesive bonding
    - Mechanical joining
    - None of the above

28. Which of the following processes is used to join two or more materials together? (1)
    - Soldering
    - Brazing
    - Adhesive bonding
    - Mechanical joining
    - None of the above

29. Which of the following processes is used to join two or more materials together? (1)
    - Soldering
    - Brazing
    - Adhesive bonding
    - Mechanical joining
    - None of the above

30. Which of the following processes is used to join two or more materials together? (1)
    - Soldering
    - Brazing
    - Adhesive bonding
    - Mechanical joining
    - None of the above

31. Which of the following processes is used to join two or more materials together? (1)
    - Soldering
    - Brazing
    - Adhesive bonding
    - Mechanical joining
    - None of the above

32. Which of the following processes is used to join two or more materials together? (1)
    - Soldering
    - Brazing
    - Adhesive bonding
    - Mechanical joining
    - None of the above

33. Which of the following processes is used to join two or more materials together? (1)
    - Soldering
    - Brazing
    - Adhesive bonding
    - Mechanical joining
    - None of the above

34. Which of the following processes is used to join two or more materials together? (1)
    - Soldering
    - Brazing
    - Adhesive bonding
    - Mechanical joining
    - None of the above

35. Which of the following processes is used to join two or more materials together? (1)
    - Soldering
    - Brazing
    - Adhesive bonding
    - Mechanical joining
    - None of the above
