Assignment II

1. Figure out how many electrons are in 1 mol of CO₂.

2. Calculate the concentration of CO₂ in the blood at 1 atm of CO₂.

3. If the concentration of CO₂ in the blood is 50 mmHg at 1 atm of CO₂, calculate the concentration of CO₂ in the air.

4. If the concentration of CO₂ in the blood is 50 mmHg at 1 atm of CO₂, calculate the concentration of CO₂ in the air.

5. The concentration of CO₂ in the blood is 50 mmHg at 1 atm of CO₂, calculate the concentration of CO₂ in the air.

6. The concentration of CO₂ in the blood is 50 mmHg at 1 atm of CO₂, calculate the concentration of CO₂ in the air.

7. The concentration of CO₂ in the blood is 50 mmHg at 1 atm of CO₂, calculate the concentration of CO₂ in the air.

8. The concentration of CO₂ in the blood is 50 mmHg at 1 atm of CO₂, calculate the concentration of CO₂ in the air.

9. The concentration of CO₂ in the blood is 50 mmHg at 1 atm of CO₂, calculate the concentration of CO₂ in the air.

10. The concentration of CO₂ in the blood is 50 mmHg at 1 atm of CO₂, calculate the concentration of CO₂ in the air.

11. The concentration of CO₂ in the blood is 50 mmHg at 1 atm of CO₂, calculate the concentration of CO₂ in the air.

12. The concentration of CO₂ in the blood is 50 mmHg at 1 atm of CO₂, calculate the concentration of CO₂ in the air.

13. The concentration of CO₂ in the blood is 50 mmHg at 1 atm of CO₂, calculate the concentration of CO₂ in the air.

14. The concentration of CO₂ in the blood is 50 mmHg at 1 atm of CO₂, calculate the concentration of CO₂ in the air.

15. The concentration of CO₂ in the blood is 50 mmHg at 1 atm of CO₂, calculate the concentration of CO₂ in the air.

16. The concentration of CO₂ in the blood is 50 mmHg at 1 atm of CO₂, calculate the concentration of CO₂ in the air.

17. The concentration of CO₂ in the blood is 50 mmHg at 1 atm of CO₂, calculate the concentration of CO₂ in the air.

18. The concentration of CO₂ in the blood is 50 mmHg at 1 atm of CO₂, calculate the concentration of CO₂ in the air.

19. The concentration of CO₂ in the blood is 50 mmHg at 1 atm of CO₂, calculate the concentration of CO₂ in the air.

20. The concentration of CO₂ in the blood is 50 mmHg at 1 atm of CO₂, calculate the concentration of CO₂ in the air.

21. The concentration of CO₂ in the blood is 50 mmHg at 1 atm of CO₂, calculate the concentration of CO₂ in the air.

22. The concentration of CO₂ in the blood is 50 mmHg at 1 atm of CO₂, calculate the concentration of CO₂ in the air.

23. The concentration of CO₂ in the blood is 50 mmHg at 1 atm of CO₂, calculate the concentration of CO₂ in the air.

24. The concentration of CO₂ in the blood is 50 mmHg at 1 atm of CO₂, calculate the concentration of CO₂ in the air.

25. The concentration of CO₂ in the blood is 50 mmHg at 1 atm of CO₂, calculate the concentration of CO₂ in the air.

26. The concentration of CO₂ in the blood is 50 mmHg at 1 atm of CO₂, calculate the concentration of CO₂ in the air.

27. The concentration of CO₂ in the blood is 50 mmHg at 1 atm of CO₂, calculate the concentration of CO₂ in the air.

28. The concentration of CO₂ in the blood is 50 mmHg at 1 atm of CO₂, calculate the concentration of CO₂ in the air.

29. The concentration of CO₂ in the blood is 50 mmHg at 1 atm of CO₂, calculate the concentration of CO₂ in the air.

30. The concentration of CO₂ in the blood is 50 mmHg at 1 atm of CO₂, calculate the concentration of CO₂ in the air.

31. The concentration of CO₂ in the blood is 50 mmHg at 1 atm of CO₂, calculate the concentration of CO₂ in the air.

32. The concentration of CO₂ in the blood is 50 mmHg at 1 atm of CO₂, calculate the concentration of CO₂ in the air.

33. The concentration of CO₂ in the blood is 50 mmHg at 1 atm of CO₂, calculate the concentration of CO₂ in the air.

34. The concentration of CO₂ in the blood is 50 mmHg at 1 atm of CO₂, calculate the concentration of CO₂ in the air.

35. The concentration of CO₂ in the blood is 50 mmHg at 1 atm of CO₂, calculate the concentration of CO₂ in the air.

36. The concentration of CO₂ in the blood is 50 mmHg at 1 atm of CO₂, calculate the concentration of CO₂ in the air.

37. The concentration of CO₂ in the blood is 50 mmHg at 1 atm of CO₂, calculate the concentration of CO₂ in the air.

38. The concentration of CO₂ in the blood is 50 mmHg at 1 atm of CO₂, calculate the concentration of CO₂ in the air.

39. The concentration of CO₂ in the blood is 50 mmHg at 1 atm of CO₂, calculate the concentration of CO₂ in the air.

40. The concentration of CO₂ in the blood is 50 mmHg at 1 atm of CO₂, calculate the concentration of CO₂ in the air.

41. The concentration of CO₂ in the blood is 50 mmHg at 1 atm of CO₂, calculate the concentration of CO₂ in the air.

42. The concentration of CO₂ in the blood is 50 mmHg at 1 atm of CO₂, calculate the concentration of CO₂ in the air.

43. The concentration of CO₂ in the blood is 50 mmHg at 1 atm of CO₂, calculate the concentration of CO₂ in the air.

44. The concentration of CO₂ in the blood is 50 mmHg at 1 atm of CO₂, calculate the concentration of CO₂ in the air.

45. The concentration of CO₂ in the blood is 50 mmHg at 1 atm of CO₂, calculate the concentration of CO₂ in the air.

46. The concentration of CO₂ in the blood is 50 mmHg at 1 atm of CO₂, calculate the concentration of CO₂ in the air.

47. The concentration of CO₂ in the blood is 50 mmHg at 1 atm of CO₂, calculate the concentration of CO₂ in the air.

48. The concentration of CO₂ in the blood is 50 mmHg at 1 atm of CO₂, calculate the concentration of CO₂ in the air.

49. The concentration of CO₂ in the blood is 50 mmHg at 1 atm of CO₂, calculate the concentration of CO₂ in the air.

50. The concentration of CO₂ in the blood is 50 mmHg at 1 atm of CO₂, calculate the concentration of CO₂ in the air.
