Week 3 Assignment 3

1. For the trigger square, write the initial state (1-0=1) from what state with what input?
2. Explain the second output (0-0=1) with what input?
3. Explain the third output (1-0=0) with what input?
4. Explain the forth output (0-1=0) with what input?
5. Explain the fifth output (0-0=0) with what input?

Suggestion: Try some different input combinations to understand the behavior of the circuit better.
