   C. Conservation is important for both the aesthetic and architectural aspects
   D. Conservation is not important for both the aesthetic and architectural aspects

9. Which of the following statements is true about the role of conservation in urban areas?
   A. Conservation is only important for the environmental aspects
   B. Conservation is only important for the cultural aspects
   C. Conservation is important for both the environmental and cultural aspects
   D. Conservation is not important for both the environmental and cultural aspects

10. Which of the following statements is true about the role of conservation in urban areas?
    A. Conservation is only important for the historical aspects
    B. Conservation is only important for the social aspects
    C. Conservation is important for both the historical and social aspects
    D. Conservation is not important for both the historical and social aspects

11. Which of the following statements is true about the role of conservation in urban areas?
    A. Conservation is only important for the economic aspects
    B. Conservation is only important for the environmental aspects
    C. Conservation is important for both the economic and environmental aspects
    D. Conservation is not important for both the economic and environmental aspects

12. Which of the following statements is true about the role of conservation in urban areas?
    A. Conservation is only important for the cultural aspects
    B. Conservation is only important for the social aspects
    C. Conservation is important for both the cultural and social aspects
    D. Conservation is not important for both the cultural and social aspects

13. Which of the following statements is true about the role of conservation in urban areas?
    A. Conservation is only important for the aesthetic aspects
    B. Conservation is only important for the functional aspects
    C. Conservation is important for both the aesthetic and functional aspects
    D. Conservation is not important for both the aesthetic and functional aspects

14. Which of the following statements is true about the role of conservation in urban areas?
    A. Conservation is only important for the material aspects
    B. Conservation is only important for the structural aspects
    C. Conservation is important for both the material and structural aspects
    D. Conservation is not important for both the material and structural aspects

15. Which of the following statements is true about the role of conservation in urban areas?
    A. Conservation is only important for the decorative aspects
    B. Conservation is only important for the functional aspects
    C. Conservation is important for both the decorative and functional aspects
    D. Conservation is not important for both the decorative and functional aspects

16. Which of the following statements is true about the role of conservation in urban areas?
    A. Conservation is only important for the economic aspects
    B. Conservation is only important for the social aspects
    C. Conservation is important for both the economic and social aspects
    D. Conservation is not important for both the economic and social aspects

17. Which of the following statements is true about the role of conservation in urban areas?
    A. Conservation is only important for the environmental aspects
    B. Conservation is only important for the cultural aspects
    C. Conservation is important for both the environmental and cultural aspects
    D. Conservation is not important for both the environmental and cultural aspects

18. Which of the following statements is true about the role of conservation in urban areas?
    A. Conservation is only important for the aesthetic aspects
    B. Conservation is only important for the functional aspects
    C. Conservation is important for both the aesthetic and functional aspects
    D. Conservation is not important for both the aesthetic and functional aspects

19. Which of the following statements is true about the role of conservation in urban areas?
    A. Conservation is only important for the material aspects
    B. Conservation is only important for the structural aspects
    C. Conservation is important for both the material and structural aspects
    D. Conservation is not important for both the material and structural aspects

20. Which of the following statements is true about the role of conservation in urban areas?
    A. Conservation is only important for the decorative aspects
    B. Conservation is only important for the functional aspects
    C. Conservation is important for both the decorative and functional aspects
    D. Conservation is not important for both the decorative and functional aspects

21. Which of the following statements is true about the role of conservation in urban areas?
    A. Conservation is only important for the economic aspects
    B. Conservation is only important for the social aspects
    C. Conservation is important for both the economic and social aspects
    D. Conservation is not important for both the economic and social aspects

22. Which of the following statements is true about the role of conservation in urban areas?
    A. Conservation is only important for the environmental aspects
    B. Conservation is only important for the cultural aspects
    C. Conservation is important for both the environmental and cultural aspects
    D. Conservation is not important for both the environmental and cultural aspects

23. Which of the following statements is true about the role of conservation in urban areas?
    A. Conservation is only important for the aesthetic aspects
    B. Conservation is only important for the functional aspects
    C. Conservation is important for both the aesthetic and functional aspects
    D. Conservation is not important for both the aesthetic and functional aspects

24. Which of the following statements is true about the role of conservation in urban areas?
    A. Conservation is only important for the material aspects
    B. Conservation is only important for the structural aspects
    C. Conservation is important for both the material and structural aspects
    D. Conservation is not important for both the material and structural aspects

25. Which of the following statements is true about the role of conservation in urban areas?
    A. Conservation is only important for the decorative aspects
    B. Conservation is only important for the functional aspects
    C. Conservation is important for both the decorative and functional aspects
    D. Conservation is not important for both the decorative and functional aspects
