Assignment 2

Due Date: [Date]

1. Given the following data on a graph:

   a. What is the trend in the data? Explain your answer.

2. Calculate the average of the following numbers:
   a. 5, 7, 9, 11, 13
   b. 1, 3, 5, 7, 9

3. Analyze the data set and provide three conclusions.

4. Interpret the graph and describe the relationship between the variables.

5. Identify any outliers in the data set and explain their significance.

6. Discuss the implications of the data for a real-world scenario.

7. Create a new graph to represent the data in a different way.

8. Write a short report summarizing your findings and conclusions.

9. Reflect on your learning experience and identify areas for improvement.

10. Submit your assignment by the due date.

Good Luck!
