Assignment 10

1. Identify the following features from the given graph:
   - Axes
   - Scale
   - Units
   - Data points

2. Explain the significance of each feature in data representation.

3. Your graph should include all relevant features identified in the previous step.

4. Based on the graph, answer the following questions:
   a. What is the trend in the data?
   b. What is the significance of this trend?

5. Your graph must clearly illustrate the data trends.

6. Add a title to your graph that accurately reflects the data being presented.

7. Include a legend if necessary to explain any symbols or colors used.

8. Your graph should be well-organized and easy to understand.

9. Write a brief analysis of the data, explaining any insights or conclusions that can be drawn.

10. Your analysis should be supported by the data presented in the graph.

11. Include any necessary references or sources for any data used.

12. Your final graph should be professionally formatted, with appropriate margins and layout.
