Module 2: Course Design and Instruction

Unit 8 - Week 6: Design Phase and Development Phase

Assignment 6

Due on 2603-11, 23:59 IST.

Part 1: Design Phase

Q1. Two assessment tasks are given to students. Assessment task A is Evaluation of the same as assessment task B. Which of the following statements is true?

A. Assessment task A is a measure of performance. Assessment task B is a measure of learning.
B. Assessment task A is a measure of learning. Assessment task B is a measure of performance.
C. Both assessment task A and B are measures of performance.
D. Both assessment task A and B are measures of learning.

Part 2: Development Phase

Q2. A final prototype test item is to be designed. Which of the following is an appropriate method to design this test item?

A. Select a type
B. Attend a seminar
C. Multiple choice
D. Test item selection

Q3. The validity of a summative assessment is the degree to which:

A. Assessment scores are consistent
B. Assessment measures what it is supposed to measure
C. Items are designed in the evaluation and reduced
D. The assessment instrument measures the pedagogical structure

Q4. A rubric is used to score test items. Which of the following is an appropriate method to design this test item?

A. Equally typed
B. Selection type
C. Performance type
D. Any of these

Q5. Managing an item bank means one of the following.

A. Managing an item bank concept
B. Removing items from the item bank
C. Reviewing items before they are added to the item bank
D. Keeping the item bank dynamic

Part 3: Design Phase

Q6. A student is taking a test. Which of the following is true?

A. Students are present in the class
B. Students are present in the test
C. Students are present in the test and are managing items
D. Students are present in the test and are comparing alignment of outcomes

Q7. The cognitive domain of the Bloom's taxonomy includes which of the following?

A. Knowledge
B. Comprehension
C. Application
D. All of the above

Part 4: Development Phase

Q8. Which of the following is an appropriate method to design this test item?

A. Equally typed
B. Selection type
C. Performance type
D. Any of these

Q9. The cognitive domain of the Bloom's taxonomy includes which of the following?

A. Knowledge
B. Comprehension
C. Application
D. All of the above

Q10. A student is taking a test. Which of the following is true?

A. Students are present in the class
B. Students are present in the test
C. Students are present in the test and are managing items
D. Students are present in the test and are comparing alignment of outcomes

Part 5: Design Phase

Q11. A student is taking a test. Which of the following is true?

A. Students are present in the class
B. Students are present in the test
C. Students are present in the test and are managing items
D. Students are present in the test and are comparing alignment of outcomes

Q12. The cognitive domain of the Bloom's taxonomy includes which of the following?

A. Knowledge
B. Comprehension
C. Application
D. All of the above

Part 6: Development Phase

Q13. A student is taking a test. Which of the following is true?

A. Students are present in the class
B. Students are present in the test
C. Students are present in the test and are managing items
D. Students are present in the test and are comparing alignment of outcomes

Q14. The cognitive domain of the Bloom's taxonomy includes which of the following?

A. Knowledge
B. Comprehension
C. Application
D. All of the above

Part 7: Design Phase

Q15. A student is taking a test. Which of the following is true?

A. Students are present in the class
B. Students are present in the test
C. Students are present in the test and are managing items
D. Students are present in the test and are comparing alignment of outcomes

Q16. The cognitive domain of the Bloom's taxonomy includes which of the following?

A. Knowledge
B. Comprehension
C. Application
D. All of the above

Part 8: Development Phase

Q17. A student is taking a test. Which of the following is true?

A. Students are present in the class
B. Students are present in the test
C. Students are present in the test and are managing items
D. Students are present in the test and are comparing alignment of outcomes

Q18. The cognitive domain of the Bloom's taxonomy includes which of the following?

A. Knowledge
B. Comprehension
C. Application
D. All of the above
