GEOLOGY AND SOIL MECHANICS

PROF. PRIYANKA GHOSH
Department of Civil Engineering
IITK

TYPE OF COURSE : Rerun | Elective | UG/PG
COURSE DURATION : 12 Weeks (18 Jan’ 21 - 09 Apr’ 21)
EXAM DATE : 25 Apr 2021

PRE-REQUISITES : Mechanics of solids/Strength of materials
INTENDED AUDIENCE : UG/PG of BTech/BE
INDUSTRIES APPLICABLE TO : Civil construction companies, PWD, PHE, Irrigation etc.

COURSE OUTLINE :
The course prepares the student to be able to make effective learning of basic soil mechanics. The course should have the pre-requisite of mechanics of solids/strength of materials course.

ABOUT INSTRUCTOR :
Dr. Priyanka Ghosh is an Associate Professor in the Department of Civil Engineering, IIT Kanpur. After completion of PhD from IISc, Bangalore in 2005, he served as faculty member at BITS, Pilani, IIT Kharagpur and IIT Kanpur. His primary research focus is in Computational Geomechanics and in particular, analysis of foundations, ground anchors, retaining structures, vibration isolation and geopolymers. He is the recipient of several awards like IEI Young Engineers Award by The Institute of Engineers (India), Outstanding Young Investigator Award by International Association for Computer Methods and Advances in Geomechanics (IACMAG), USA, Scholarship for Young Indian Researchers by the Italian Ministry of Education, University and Research, Indo-US Research Fellowship by Indo-US S&T Forum, Class of 1982 Research Fellowship by IIT Kanpur etc. He has published several research papers in various international journals and conferences.

COURSE PLAN :
Week 1: Description of soil, engineering geology of soils and their formation, clay mineralogy
Week 2: Index properties of soil
Week 3: Classification of soils
Week 4: Soil compaction
Week 5: Permeability in soil & Seepage in soil and flow net construction
Week 6: Seepage in soil and flow net construction
Week 7: In-situ stresses & criteria for filter design
Week 8: Effective stress principle & soil-water systems: capillarity
Week 9: Fundamental of consolidation
Week 10: Fundamental of consolidation & Shear strength of soil
Week 11: Shear strength of soil
Week 12: Stress in soil (Boussinsq, Westergaard theories) & Earth pressure theories
