PROF. RAGHUNATHAN RENGASAMY
Department of Chemical Engineering
IIT Madras

TYPE OF COURSE : Rerun | Elective | UG/PG
COURSE DURATION : 8 weeks (26 July' 21 - 17 Sep’ 21)
EXAM DATE : 26 Sep 2021

PROF. SHANKAR NARASIMHAN
Department of Chemical Engineering
IIT Madras

PRE-REQUISITES : 10 hrs of pre-course material will be provided, learners need to practise this to be ready to take the course.

INTENDED AUDIENCE : Any interested learner
INDUSTRIES APPLICABLE TO : HONEYWELL, ABB, FORD, GYAN DATA PVT. LTD.

COURSE OUTLINE :
This course will Introduce: R as a programming language, mathematical foundations required for data science, the first level data science algorithms, data analytics problem solving framework, practical capstone case study Course will also describe a flow process for data science problems (Remembering) , Classify data science problems into standard typology (Comprehension), Develop R codes for data science solutions (Application) , Correlate results to the solution approach followed (Analysis), Assess the solution approach (Evaluation) , Construct use cases to validate approach and identify modifications required (Creating).

ABOUT INSTRUCTOR :
Prior to joining IIT Madras as a professor, Prof.Rengaswamy was a professor of Chemical Engineering and Co-Director of the Process Control and Optimization Consortium at Texas Tech University, Lubbock, USA. He was also a Professor at Clarkson University, USA and Assistant Professor at IIT Bombay. His major research interests are in the areas of fault detection and diagnosis and development of data science algorithms for manufacturing industries.

Prof. Shankar Narasimhan is currently a professor in the department of Chemical Engineering at IIT Madras. His major research interests are in the areas of data mining, process design and optimization, fault detection and diagnosis and fault tolerant control. He has co-authored several important papers and a book titled Data Reconciliation and Gross Error Detection: An Intelligent Use of Process Data which has received critical appreciation in India and abroad.

COURSE PLAN :
Week 1: Course philosophy and introduction to R
Week 2: Linear algebra for data science
Week 3: Statistics
Week 4: Optimization
Week 5: Typology of data science problems and a solution framework
Week 6: Simple linear regression and verifying assumptions used in linear regression, Multivariate linear regression, model assessment, assessing importance of different variables, subset selection
Week 7: Classification using logistic regression
Week 8: Classification using kNN and k-means clustering
