MODELLING AND SIMULATION OF DYNAMIC SYSTEMS

PROF. PUSHPARAJ MANI PATHAK
Department of Mechanical Engineering
IIT Roorkee

PROF. PUSHPARAJ MANI PATHAK
Department of Mechanical Engineering
IIT Roorkee

TYPE OF COURSE : Rerun | Elective | UG/PG
COURSE DURATION : 8 weeks (18 Jan' 21 - 12 Mar' 21)
EXAM DATE : 21 Mar 2021

PRE-REQUISITES : None
INTENDED AUDIENCE : B. Tech/M.Tech students or Professionals, It is a core course for PG and Elective course for UG.
INDUSTRIES APPLICABLE TO : Railways, DRDO

COURSE OUTLINE :
The term modeling refers to the development of a mathematical representation of a physical system while the term simulation refers to the procedure of solving the equations that resulted from model development. The quality or usefulness in a model is measured by its ability to capture the governing physical features of the problem. Here, the expertise of the modeler is useful. The model is amenable to manipulation which would be impossible, too expensive, or too impractical to perform on the system which it portrays. This feature makes it a very useful tool to study system behavior.

ABOUT INSTRUCTOR :
Prof. Pushparaj Mani Pathak is currently Associate Professor at IIT Roorkee. He was graduated from N.I.T., Calicut in 1988 in Mechanical Engineering. He completed his M. Tech in Solid Mechanics and Design from IIT Kanpur in 1998. Later he was awarded the PhD degree from IIT Kharagpur in 2005. His areas of research are Robotics, Dynamics, Control, and Bond Graph Modelling. He has served in different industries from 1989 to 1994. He is in teaching profession since 1994. He is serving in Mechanical and Industrial Engineering Department, IIT Roorkee since 2006. He has co-authored one book on Intelligent Mechatronic Systems: Modeling, Control and Diagnosis published by Springer, London and has published more than 40 papers in International Journals in the field of Robotics and Control. He has supervised 34 M. Tech theses and 7 PhD theses in different areas.

COURSE PLAN :
Week 1: Introduction to Modelling and Simulation
Week 2: Bond Graph Modelling of Dynamic Systems
Week 3: Basic System Models
Week 4: System Models of Combined Systems
Week 5: Dynamic Response and System Transfer Function
Week 6: Block diagram/Signal flow diagram/State Space formulation and Frequency response
Week 7: Simulation and Simulation application
Week 8: Parameter Estimation, System Identification and Optimization
