TEXTILE FINISHING

PROF. KUSHAL SEN
Department of Textile Engineering
IIT Delhi

TYPE OF COURSE : Rerun | Core / Elective | PG/UG
COURSE DURATION : 12 weeks (20 Jul'20 - 09 Oct'20)
EXAM DATE : 17 Oct 2020

PRE-REQUISITES : Should have knowledge of fibres, preferably of preparatory processes and dyeing

INTENDED AUDIENCE : Students, Teachers and those working in Textile Industry, especially in man-made fibre industry

INDUSTRIES APPLICABLE TO : Textile Industry, Particularly Chemical Processing Industry

COURSE OUTLINE:
This course would cover the Science and Application of various finishing processes based on the need and Chemistry of the Fibres, Cellulose based, Protein based and Synthetics. Fundamentals of the techniques and the Chemistry finishing agents, Mechanisms applicable to various finishing techniques. Some introduction to relevant machines and characterization of finished fabrics would also be covered.

ABOUT INSTRUCTOR :
Currently a Professor in the Department of Textile Technology, IIT Delhi. Areas of specialization include textile chemical processing, texturing, and structure-property correlations. He had attended lot of conferences and published many papers.

COURSE PLAN :
Week 1: Introduction , General classification of finishes, Mechanical finishing; Sanforization
Week 2: Wrinkle-resist finishing, Need, General approach for obtaining finished product
Week 3: Cross-linking agents, Catalysts needed, Process and Evaluation
Week 4: Stiffeners and Softeners
Week 5: Waterproof, Water repellent, Waterproof breathable finishing
Week 6: Flame retardants and Finishing thereof
Week 7: Antimicrobial finishing; Bio-polishing
Week 8: Soil repellency and Soil release finishing
Week 9: Finishing of wool; Milling, setting, Shrink-resistant finishing, Special finishing of silk
Week 10: Energy efficient technology; Low liquor application and foam finishing
Week 11: Finishing of synthetics; Heat setting, Antistatic and other special finishing
Week 12: Mangles, driers and Stenters
