TYPE OF COURSE: ReRun | Elective | PG I UG
COURSE DURATION: 12 weeks (20 Jul’ 20 - 09 Oct’ 20)
EXAM DATE: 17 Oct 2020

PRE-REQUISITES: Motivation & open-mindedness is the only pre-requisite
INDUSTRIES APPLICABLE TO: This course will prepare individuals with no knowledge of neuroscience to become knowledgeable about neuroscience of movements.

COURSE OUTLINE:
Neuroscience of Human Movement will focus on the neural system responsible for movement generation, movement control and learning of actions. The course will start from the very basics of neuroscience and build theory to understand the movement control system in relatively good detail and depth. The successful student of this course will be able to appreciate in-depth, the brain processes that control movement.

ABOUT INSTRUCTOR:
Dr. Varadhan SKM is an Assistant Professor in Biomedical Engg at IIT Madras. His research interests are in the area of Neural control of movements, Motor learning, and Dexterous object manipulation in the presence of static and dynamic perturbations (See website for more details). He teaches courses on Biomechanics, Neuromechanics, Engg Mechanics, Biomedical Instrumentation, Quantitative Physiology.

COURSE PLAN:
Week 1: Introduction, Membrane Physiology, Nernst Equation, GHK Equation
Week 2: Action Potential, Neuromuscular Junction, Skeletal Muscles, Motor Units
Week 3: Receptors, Muscle Spindles, Golgi Tendon Organs, Spinal control
Week 4: Monosynaptic, Oligosynaptic & Polysynaptic reflexes, Preprogrammed reactions
Week 5: Overview of motor control system, Primary Motor cortex – Part 1
Week 6: Primary Motor cortex – Part 2
Week 7: Primary Motor Cortex – Part 3, Lesions, Brain Machine interfaces
Week 8: Parietal & Pre-motor cortex
Week 9: Role of Cerebellum in movement control
Week 10: Role of Cerebellum in movement control
Week 11: Role of Basal Ganglia in movement control
Week 12: Role of Basal Ganglia in movement control (Cont'd)
